Contents of Volume 174 No. 1

Special Issue:

9th Summer School in Immunotoxicology: Preclinical safety evaluation of immunotherapeutics
Nice, France, 23–25 October 2000

Guest Editor: J. Descotes

Editorial 1

Adverse effects of immunotherapeutics involving the immune system
T. Vial, G. Choquet-Kastylevsky, J. Descotes (France) 3–11
Preclinical evaluation of gene transfer products: safety and immunological aspects
M. Christ (France) 13–19
Preclinical safety evaluation of monoclonal antibodies
R. Foulkes (UK) 21–26
Nonclinical evaluation of therapeutic cytokines: immunotoxicologic issues
P.T. Thomas (USA). 27–35
Non-clinical vaccine safety assessment
F. Verdier (France) 37–43
Vaccines: predicting the risk of allergy and autoimmunity
J. Descotes, G. Ravel, C. Ruat (France). 45–51
Preclinical assessment of anti-CD40 Mab 5D12 in cynomolgus monkeys
L. Boon, J.D. Laman, A. Ortiz-Buijsse, M.T. den Hartog, S. Hoffenberg, P. Liu, F. Shiau, M. de Boer (The Netherlands, USA) 53–65

Instructions to Authors. 67–68

Contents of Volume 174 No. 2

Articles

Lack of antiandrogenic effects in adult male rats following acute exposure to 2,2-bis(4-chlorophenyl)-1,1-dichloroethylene (*p,p′*-DDE)
T.L. Leavens, B.R. Sparrow, M.J. Devito (USA). 69–78
Biochemical changes in primary culture of skeletal muscle cells following dimethoate exposure
D. Yang, X. Lu, W. Zhang, F. He (USA, PR China) 79–85
Does prolonged oral exposure to cyanide promote hepatotoxicity and nephrotoxicity?
A.B. Sousa, B. Soto-Blanco, J.L. Guerra, E.T. Kimura, S.L. Górniak (Brazil). 87–95
Comparison of antiandrogenic activities of vinclozolin and D,L-camphorquinone in androgen receptor gene transcription assay in vitro and mouse in utero exposure assay in vivo
M. Shimamura, K. Kodaira, H. Kenichi, Y. Ishimoto, H. Tamura, T. Iguchi (Japan) 97–107
Upregulation of stress response mRNAs in COS-7 cells exposed to cadmium
M.J. Lee, H. Nishio, H. Ayaki, M. Yamamoto, K. Sumino (Japan). 109–117

Effects of 2,3,7,8-tetrachlorodibenzo-*p*-dioxin (TCDD) on preimplantation mouse embryos
Q. Wu, S. Ohsako, T. Baba, K. Miyamoto, C. Tohyama (Japan) 119–129

Environmental and Nutritional Interaction
Effect of some hypoglycemic herbs on the activity of phase I and II drug-metabolizing enzymes in alloxan-induced diabetic rats
S.A. Sheweita, A.A. Newairy, H.A. Mansour, M.I. Yousef (Egypt) 131–139

Web Alerts
INCHEM—From the International Programme on Chemical Safety (IPCS)
P. Wexler (USA). 141

Contents of Volume 174 No. 3

Immunotoxicology
Local immunotherapy with rhTNF-α mutein induces strong antitumor activity without overt toxicity—a review
S.J. Terlikowski (Poland). 143–152
Blood and spleen lymphocytes as targets for immunotoxic effects in the rat—a comparison
U.C. Nygaard, M. Løvik (Norway). 153–161
Immunological and physiological effects of chronic exposure of *Peromyscus leucopus* to Aroclor 1254 at a concentration similar to that found at contaminated sites
M. Segre, S.M. Arena, E.H. Greeley, M.J. Melancon, D.A. Graham, J.B. French Jr. (USA) 163–172
Developmental toxicity but no immunotoxicity in the rat after prenatal exposure to diethylstilbestrol
A.H. Piersma, A. Verhoef, C.G.J. Sweep, W.H. de Jong, H. van Loveren (The Netherlands) 173–181
Immunotoxicity of nucleic acid reduced BioProtein—a bacterial derived single cell protein—in Wistar rats
A.-M. Mølck, M. Poulsen, H.R. Christensen, S.T. Lauridsen, C. Madsen (Denmark). 183–200
DDT inhibits the functional activation of murine macrophages and decreases resistance to infection by *Mycobacterium microti*
M.A. Nuñez G, I. Estrada, E.S. Calderon-Aranda (Mexico) 201–210
